Dear Sir:

As a follow-up to the interview that was conducted Tuesday, April 3, 2001 with Examiner Fratzy Poinvil at the U.S. Patent Office, Applicant respectfully submits the following remarks in an effort to clarify clear window time periods.

Remarks

A clear window is a period of time before and after an episode of care during which a patient cannot receive medical services associated with the episode of care. When a patient does not receive medical services during the clear window time period associated with the first and last service records within an episode of care, the clear window defines the onset and resolution points of the episode of care. See page 30, lines 32-33, Revised Specification. (The Original Specification also included language supporting clear window processing "[c]lear window processing defines the onset and resolution points of a diagnosis to establish an episode of care." Original Specification page 66, lines 25-25). In addition, a clear window is a "dynamic" time period. Each episode of care has its own unique clear window time period.

In order to assist in understanding the operation of the invention the specification describes, Applicant initially points out that the present invention includes a plurality of tables within a relational database that are linked and stored in system data storage. Two tables within
